EXPERIENCE

Peanut Mar 2022 - Oct 2024
Senior Software Developer *London, UK (Remote)*

- Achieved seamless user experience and visually engaging web pages by translating design concepts and wireframes from Figma, into fully functional pages in collaboration with the design team.
- Migrated part of the site from legacy code to Next.js and improved legacy code, optimizing load times and performance, resulting in faster page speed and enhanced user satisfaction.
- Drove a 27% reduction in bounce rate and a 777% increase in average time on page through collaboration with the product team, focusing on user engagement improvements.
- Managed technical interviews for web development candidates, evaluating skills, problem-solving abilities, and team fit, contributing to a stronger development team.

Mindgeek Jul 2019 - Mar 2022
Software Developer *Nicosia, CY*

- Designed and implemented an admin dashboard for the Marketing team, streamlining the management of product promotions and improving team efficiency.
- Created a real-time video broadcasting platform with interactive chat features, boosting audience engagement by 25% and improving user interaction.
- Led the integration of Redux for state management and WebSocket for real-time data handling within a legacy application, improving development experience and system maintainability.

Amdocs Sep 2017 - Jul 2019
Software Developer *Limassol, CY*

- Developed UI components as part of the CORE team, improving developer experience and reducing troubleshooting time for the entire development team.
- Integrated Storybook, streamlining the process and enhancing consistency across reusable components.

Huawei Dec 2016 - Sep 2017
Network Engineer *Nicosia, CY*

- Improved network stability by conducting daily maintenance, troubleshooting, and efficient issue escalation.

PROJECTS

Mirmigki.com (NextJS)

- Job board for Cyprus and Greece with AI-enhanced job listings using Claude AI.
- Built with Next.js and Tailwind CSS to optimize speed, SEO, and responsive design.
- Utilized Supabase as the primary database and integrated Stripe for secure payment processing.
- Self-hosted on Hetzner, with Directus CMS, UptimeKuma for uptime, and Sentry for error tracking.
